The Houston Airport System (HAS) is a three-airport system that consists of:

1. George Bush Intercontinental (IAH), the city's largest airport and global gateway
2. William P. Hobby (HOU), a medium-sized, low-cost regional international airport
3. Ellington Airport (EFD), a commerce and aviation center a licensed commercial spaceport, accommodating general aviation and U.S. Government operations

According to a 2019 economic impact study, HAS supports more than 190K regional jobs and contributes more than $36.4 billion to the local economy.

HAS does not use local tax dollars and is entirely self-supporting through user fees and lease agreements.

The Houston Airport System served more than 59.7 million passengers in 2019.
